Executive Summary

SafeCity is a full-stack civic incident reporting platform built with Django (backend), React/Vite (frontend), Docker, Kubernetes/Helm, Terraform, and Ansible. The project follows a conventional commit workflow (`feat:`, `fix:`, `docs:`, `test:`, `chore:`, `ci:`) and uses a protected branching strategy (`main`, `develop`, `feature/*`, `fix/*`, `release/*`, `hotfix/*`).

The team consists of **4 named contributors** whose work spans core authentication/authorization, security hardening, accessibility fixes, CI/CD pipeline setup, monitoring/observability, test coverage, documentation, and infrastructure-as-code. All 5 GitHub Actions workflows pass on PR #19 and PR #20 and on `main` push.

Contributor Overview

Contributor	Git Identity	Primary Focus	Commit Count
GABRIEL P	`GABRIEL P`	Core platform (auth, RBAC, PII), security hardening (CVEs), Docker/Kubernetes infrastructure, release merges	~20+

Contributor	Git Identity	Primary Focus	Commit Count
Hazel Sanctis	`hazel sanctis`	Documentation, deployment guides, audit reports, compliance evidence, frontend UI/a11y	11+
dherazlin jebisha	`dherazlin jebisha`	Accessibility (a11y) fixes, CI/CD pipeline fixes, observability metrics, security (CSP)	9
joe godwin	`joe godwin`	Test suites (auth, 2FA, OAuth), monitoring stack (Prometheus/Grafana), Ansible playbooks, e2e testing	6

> **Note on attribution:** Per the DEVOTS-AUDIT.md Section A2, commits are attributed to `hazel sanctis`, `dherazlin jebisha`, `joe godwin` (conventional commits) plus the original author (GABRIEL P). Frontend/UI-related commits have been attributed to Hazel Sanctis where relevant (see [Detailed Contributions](#detailed-contributions-by-person) below).

Detailed Contributions by Person

GABRIEL P — Core Platform & Infrastructure

GABRIEL P is the original author (repository owner `gab1-05`). Their contributions form the backbone of the SafeCity platform: authentication, authorization, security hardening, containerization, infrastructure-as-code, and release management.

Security & Hardening

Commit	Hash	Explanation
`fix: bump Pillow to >=12.3`	`a1c2380`	Cleared Trivy HIGH/CRITICAL CVEs in the Python image dependency chain
`fix: nginx 1.27 -> 1.29 + apk upgrade`	`4faa061`	Upgraded Alpine-based images to clear HIGH/CRITICAL OS-level CVEs flagged by Trivy
`fix: Django 5.0 -> 5.2 LTS + DRF 3.16`	`d544deb`	Upgraded Django and Django REST Framework to clear a GeoDjango RCE CVE
`fix: apt upgrade in backend image`	`0650bec`	Ran `apt-get full-upgrade` in the backend Dockerfile to clear Debian OS CVEs
`ci: Trivy gate fails only on fixable CVEs`	`ece520d`	Configured Trivy image scanning with `--ignore-unfixed` so CI fails only on remediable CVEs

Core Platform Features

Commit	Hash	Explanation
`fix: close P0 auth/RBAC/PII gaps`	`4c477cb`	Closed priority-zero gaps in authentication, role-based access control, and personally identifiable information handling
`test: authz guard regressions + ruff fixes`	`6e14f26`	Added authorization guard regression tests and fixed lint issues flagged by Ruff
`feat: add response caching`	`509f52f`	Added 60s analytics caching and 30s public list caching; test cache isolation; admin KPI fixes
`Perf+ops: response caching, N+1 fixes`	`24b8c85`	Performance and operations: response caching, N+1 query fixes, admin registry extensions, Kind HPA overlay, runbooks
`fix: COPY requirements path for Render`	`ea832b9`	Fixed the Docker COPY path for requirements files in the Render build context

CI/CD, Docker & Infrastructure

Commit	Hash	Explanation
`fix docker-ci: lowercase GHCR tags`	`dd5efa3`	Lowercased GitHub Container Registry tags, added `actions:write` for cache, restricted Trivy to push events

Commit	Hash	Explanation
`Jenkinsfile: drop timestamps() option`	`91ac9a0`	Removed unavailable `timestamps()` option from Jenkinsfile (requires timestamper plugin)
`Merge pull request #21 from develop`	`c3c7e9e`	Merged PR #21 (monitoring + SDG evidence) into `main`
`Merge pull request #20 from develop`	`3994959`	Merged PR #20 (develop→main promotion) into `main`
`Merge pull request #19 from fix/ci-green-and-docs`	`675ce81`	Merged PR #19 (CI green + docs) into `develop`
`Merge branch 'main' into fix/all-bugs`	`32255de`	Merged `main` into the `fix/all-bugs` branch
`trig: force GitHub Actions re-run`	`4ec6d13`	Triggered a GitHub Actions re-run for workflow verification

---

Hazel Sanctis — Documentation, Frontend UI, Deployment

Hazel Sanctis contributed primarily through documentation, deployment guides, audit reports, compliance evidence, and frontend UI/accessibility work. Several frontend-facing commits (accessibility, notification UI, map markers, CSP origins for frontend) are attributed here.

Documentation & Compliance Evidence

	Hash	Explanation
unnel deployment guide + README public deploy section`	`a1a1407`	Added the Cloudflare Tunnel deployment guide and a public deployment section to README.md
tunnel overlay + step 4b free-online evidence`	`b52d92e`	Documented the free Cloudflare quick-tunnel public demo and step 4b evidence
les, dashboard targets, gate tables aligned with /api/metrics/`	`401491a`	Aligned Prometheus alert rules, Grafana dashboard targets, and CI gate tables with the metrics expositi
mmary, achievements, step 5 monitoring evidence`	`419a1f3`	Compiled the final DEVOTS audit summary, achievements list, and step 5 monitoring evidence
audit report, ≈92% compliance, READY FOR REVIEW verdict`	`071f32c`	Authored the complete DEVOTS compliance audit report (~92% compliance, ready for review)
vidence + SDG 11 alignment`	`17bbdf4`	Documented monitoring stack evidence and SDG 11 (Sustainable Cities) alignment with stakeholder val
orkflow evidence`	`7b7a005`	Documented PR #19 and PR #20 workflow evidence, including main-push verification
orm + kind evidence`	`c6989d1`	Documented Terraform fmt/validate passes, Kind cluster rev 14 health checks, AWS decision status
ry + achievements updated to 95% compliance`	`bfde7ce`	Updated final summary and achievements to reflect 95% compliance after PR #21 merge
ontribution overview`	`c2b196a`	Added Hazel Sanctis's contribution overview document

Frontend UI & Accessibility (Attributed to Hazel)

	Hash	Explanation
name the notification bell`	`13b56a9`	**Frontend UI:** Dropped the button-in-link anti-pattern so the notification bell is a single labeled control when the unread
give Leaflet map markers accessible names`	`3a03b7b`	**Frontend UI:** Added `title`/`alt` attributes to Leaflet map markers so they are accessible to screen readers
w the :5174 origin for the e2e SPA`	`52b047e`	**Frontend/CI:** Allowed the `:5174` frontend origin in CORS for e2e tests, pinned trivy-action, aligned Playwright baseU
k deploy workflow, a11y e2e spec, security.txt`	`51dd10a`	Tracked the deploy workflow, a11y e2e spec, `security.txt`, and pitch assets in the repo

Total attributed to Hazel Sanctis: 13 commits (9 docs/deployment + 4 frontend/UI/CI).

---

dherazlin jebisha — Accessibility, CI/CD, Observability

dherazlin jebisha focused on accessibility remediation, CI/CD pipeline reliability, security headers, and observability metrics.

	Hash	Explanation
l fix`	`1208620`	Applied dherazlin's operational fix (specific details in commit)
validation, session revoke route and seeder idempotency`	`a2b9095`	Fixed TOTP two-factor authentication leading-zero validation, repaired session revocation route, and made th
arkers accessible names`	`3a03b7b`	Added `title`/`alt` attributes to Leaflet map markers for screen reader accessibility
n bell`	`13b56a9`	Dropped button-in-link anti-pattern so the notification bell is a single labeled control when unread count is 0
or the e2e SPA`	`52b047e`	Allowed `:5174` frontend origin in CORS for e2e tests; pinned trivy-action; aligned Playwright baseURL defaul
.0`	`3239075`	Pinned Trivy GitHub Action to v0.28.0 so SARIF scans complete reliably; kept report as CI artifact
tion at /api/metrics/`	`cc45c90`	Implemented the Prometheus metrics exposition endpoint with request counters and live gauges
d sort imports`	`940327a`	Removed unused imports and sorted imports per Ruff rules (F401, I001)

Total: 8 commits

---

joe godwin — Testing, Monitoring, Configuration Management

joe godwin focused on test coverage, monitoring infrastructure, configuration management, and end-to-end testing.

	Hash	Explanation
verage`	`d5b311e`	Added joe's test coverage to the backend test suite
books for configuration management`	`9e218b2`	Added Ansible playbooks (`site.yml`, `install-postgres.yml`, `install-redis.yml`, `install-app.yml`) for configuration
tack (Prometheus/Grafana) and kind deployment script`	`4f3baba`	Added Prometheus + Grafana monitoring stack and the Kind cluster deployment script
port with monitoring stack and deployment fixes`	`c9fe95c`	Updated the DEVOTS audit report to reflect monitoring stack and deployment fixes
Auth/commands suites`	`c602d87`	Added authentication, 2FA, OAuth, and management command test suites — backend coverage 82% (gate 80%
core/playwright dependency`	`7bd6ed9`	Added `@axe-core/playwright` for accessibility e2e scanning; wait for map markers before axe scan; dropped u

Commit Attribution Table (Adjusted)

The table below shows all tracked commits with their original author and the attribution used in this report. Frontend/UI-related commits have been moved to **Hazel Sanctis** per request.

#	Original Author	Report Attribution	Hash	Commit Message	Category
1	GABRIEL P	GABRIEL P	`940327a`	fix: remove unused import and sort imports (ruff F401/I001)	Chore
2	hazel sanctis	Hazel Sanctis	`213ebbb`	updated docs & deployment guide added	Docs

#	Original Author	Report Attribution	Hash	Commit Message	Category
3	hazel sanctis	Hazel Sanctis	`a1a1407`	docs: Cloudflare Tunnel deployment guide + README public deploy section	Docs
4	hazel sanctis	Hazel Sanctis	`bfde7ce`	docs: final summary + achievements updated to 95% compliance	Docs
5	GABRIEL P	GABRIEL P	`c3c7e9e`	Merge pull request #21 from develop	Merge
6	hazel sanctis	Hazel Sanctis	`17bbdf4`	docs: monitoring evidence + SDG 11 alignment	Docs
7	hazel sanctis	Hazel Sanctis	`071f32c`	docs: full DEVOTS audit report, ≈92% compliance	Docs
8	hazel sanctis	Hazel Sanctis	`419a1f3`	docs: final audit summary, achievements, step 5 monitoring evidence	Docs
9	hazel sanctis	Hazel Sanctis	`401491a`	docs(obs): alert rules, dashboard targets, gate tables aligned	Docs
10	dherazlin jebisha	dherazlin jebisha	`cc45c90`	feat(obs): Prometheus exposition at /api/metrics/	Feature
11	hazel sanctis	Hazel Sanctis	`b52d92e`	docs: public-demo tunnel overlay + step 4b free-online evidence	Docs
12	dherazlin jebisha	dherazlin jebisha	`4911a58`	fix(deploy): build-time CSP connect-src origins	Fix
13	hazel sanctis	Hazel Sanctis	`c6989d1`	docs: step 4 terraform + kind evidence	Docs
14	hazel sanctis	Hazel Sanctis	`7b7a005`	docs: step 3 PR workflow evidence	Docs
15	GABRIEL P	GABRIEL P	`3994959`	Merge pull request #20 from develop	Merge
16	GABRIEL P	GABRIEL P	`675ce81`	Merge pull request #19 from fix/ci-green-and-docs	Merge
17	dherazlin jebisha	dherazlin jebisha	`13b56a9`	fix(a11y): name the notification bell	**Frontend/UI → Hazel Sanctis**
18	dherazlin jebisha	dherazlin jebisha	`52b047e`	fix(ci): allow the :5174 origin for the e2e SPA	**Frontend/CI → Hazel Sanctis**
19	hazel sanctis	Hazel Sanctis	`39013a2`	docs: accurate pipeline and gate docs, resolved limitations	Docs
20	joe godwin	joe godwin	`7bd6ed9`	test(e2e): add @axe-core/playwright dependency	Test
21	dherazlin jebisha	dherazlin jebisha	`3a03b7b`	fix(a11y): give Leaflet map markers accessible names	**Frontend/UI → Hazel Sanctis**
22	dherazlin jebisha	dherazlin jebisha	`3239075`	fix(ci): pin trivy-action to v0.28.0	CI
23	hazel sanctis	Hazel Sanctis	`51dd10a`	chore: track deploy workflow, a11y e2e spec, security.txt	Chore
24	joe godwin	joe godwin	`c602d87`	test: add auth/2FA/OAuth/commands suites	Test
25	dherazlin jebisha	dherazlin jebisha	`a2b9095`	fix: repair TOTP leading-zero validation, session revoke route	Fix
26	joe godwin	joe godwin	`c9fe95c`	docs: update audit report with monitoring stack	Docs
27	joe godwin	joe godwin	`4f3baba`	feat: add monitoring stack (Prometheus/Grafana) and kind script	Feature
28	joe godwin	joe godwin	`9e218b2`	feat: add ansible playbooks for configuration management	Feature
29	joe godwin	joe godwin	`d5b311e`	test: add joe's test coverage	Test
30	dherazlin jebisha	dherazlin jebisha	`1208620`	fix: add dherazlin's operational fix	Fix
31	hazel sanctis	Hazel Sanctis	`c2b196a`	feat: add hazel's contribution overview	Feature
32	GABRIEL P	GABRIEL P	`4ec6d13`	trig: force GitHub Actions re-run	CI
33	GABRIEL P	GABRIEL P	`d3fba79`	fix: update trivy-action to v0.2.0	Fix
34	GABRIEL P	GABRIEL P	`32255de`	Merge branch 'main' into fix/all-bugs	Merge
35	GABRIEL P	GABRIEL P	`ea832b9`	fix: COPY requirements path for Render build context	Fix
36	GABRIEL P	GABRIEL P	`29d6c8c`	Merge pull request #18 from gab1-05/fix/all-bugs	Merge
37	GABRIEL P	GABRIEL P	`ece520d`	ci: Trivy gate fails only on fixable CVEs	CI
38	GABRIEL P	GABRIEL P	`0650bec`	fix: apt upgrade in backend image to clear Debian OS CVEs	Fix

#	Original Author	Report Attribution	Hash	Commit Message	Category
39	GABRIEL P	GABRIEL P	`d544deb`	fix: Django 5.0 -> 5.2 LTS + DRF 3.16	Fix
40	GABRIEL P	GABRIEL P	`4faa061`	fix: nginx 1.27 -> 1.29 + apk upgrade	Fix
41	GABRIEL P	GABRIEL P	`a1c2380`	fix: bump Pillow to >=12.3	Fix
42	GABRIEL P	GABRIEL P	`6e14f26`	test: authz guard regressions + ruff fixes	Test
43	GABRIEL P	GABRIEL P	`4c477cb`	fix: close P0 auth/RBAC/PII gaps	Fix
44	GABRIEL P	GABRIEL P	`91ac9a0`	Jenkinsfile: drop timestamps() option	Fix
45	GABRIEL P	GABRIEL P	`163ae05`	Improvements batch: rate-limit headers, audit retention, N+1	Improvements
46	GABRIEL P	GABRIEL P	`24b8c85`	Perf+ops: response caching, N+1 fixes, admin registry extend	Perf/Ops
47	GABRIEL P	GABRIEL P	`dd5efa3`	Fix docker-ci: lowercase GHCR tags, actions:write for cache	Fix
48	GABRIEL P	GABRIEL P	`a87ef1a`	updated docs	Docs
49	GABRIEL P	GABRIEL P	`e239d34`	updated docs	Docs
50	GABRIEL P	GABRIEL P	`509f52f`	Add response caching, test cache isolation, assign dialog + admin KPI fixes	Feature

Frontend commits moved to Hazel Sanctis: 3 commits (notification bell a11y, Leaflet map markers a11y, :5174 CORS origin for e2e SPA).

How to Convert to PDF

This document is written in Markdown. To convert it to a PDF:

Option 1: VS Code (Markdown PDF extension)

1. Open `CONTRIBUTIONS_REPORT.md` in VS Code
2. Install the "Markdown PDF" extension

3. Open the Command Palette (`Ctrl+Shift+P` / `Cmd+Shift+P`)

4. Run "Markdown PDF: Export (pdf)"

Option 2: Pandoc (command line)

```
pandoc CONTRIBUTIONS_REPORT.md -o CONTRIBUTIONS_REPORT.pdf --pdf-engine=xelatex
```

Option 3: Browser Print

1. Open the Markdown file in a Markdown viewer (GitHub, Typora, Obsidian, etc.)

2. Print → Save as PDF

Report generated from git commit history and contributor MD files in the SafeCity repository (https://github.com/gab1-05/SafeCity).
